

SUMMARY

Cloud & DevOps Engineer with 5+ years of experience automating, scaling, and securing cloud infrastructure across AWS, Azure, and GCP. Expertise in IaC (Terraform, CloudFormation), CI/CD (GitHub Actions, Jenkins, Azure DevOps), and container orchestration (EKS, AKS). Proven to improve deployment velocity by 60%, cut cloud costs by 30%, and ensure 99.9% uptime through proactive monitoring, observability, and incident automation. Focused on reliability, DevSecOps, and resilient system design.

SKILLS

- **Cloud Platforms & Services:** AWS (EC2, S3, RDS, Lambda, CloudWatch, CloudFront, VPC), Azure (VMs, AKS, Blob Storage, Key Vault, DevOps, Monitor), GCP (Compute Engine, GKE, Cloud Storage). Experienced in SaaS, PaaS, and IaaS environments
- **Infrastructure as Code (IaC) & Automation:** Terraform, CloudFormation, ARM Templates, Ansible, Puppet, SaltStack. Expert in automating infrastructure provisioning and configuration management.
- **DevOps Core:** GitHub Actions, Jenkins, ArgoCD, Azure DevOps, Harness, CircleCI, Bitbucket, Travis CI. Skilled in pipeline automation, GitOps, blue-green & canary deployments.
- **Containerization & Orchestration:** Docker, Kubernetes (EKS, AKS, GKE, OpenShift), Helm, ECS, Docker Swarm, Service Mesh. Hands-on experience with microservices and container lifecycle management.
- **SRE/Observability:** Prometheus, Grafana, Datadog, Dynatrace, PagerDuty, ELK, Splunk, CloudWatch, SonarQube, Nagios. Strong focus on alerting, tracing, and incident response automation.
- **Security:** IAM, WAF, KMS, HashiCorp Vault, Secrets Manager, Data Encryption, CIS Benchmarks, Cloud Security Posture Management (CSPM), DevSecOps pipeline integration.
- **Scripting & Programming:** Python, Go, Bash, PowerShell, YAML, JSON, C#, JavaScript, .NET. Developed automation scripts and cloud security automation for infrastructure management.
- **Networking & Databases:** VPC, Subnets, Route53, Load Balancing, DNS, VPN, TLS/SSL, Firewalls. Databases: MySQL, Redis, PostgreSQL, MongoDB, DynamoDB, SQL Server, Oracle SQL.
- **Development & Collaboration Tools:** Versioning (Git, GitHub, GitLab), Jira, Confluence, Maven, Gradle, Nexus, RabbitMQ, Nginx, Apache, Tomcat. Agile/Scrum experience with ServiceNow-based ticketing.
- **Operating Systems:** Linux (Ubuntu, RedHat, CentOS), Unix, Windows Server, macOS, VMware, Hyper-V, Vagrant.

EXPERIENCE

University of Louisville | Site Reliability Engineer

Aug 2024 – May 2025 | USA

- Automated multi-regional AWS infrastructure using reusable Terraform modules and GitHub Actions workflows, ensuring environment consistency and reducing provisioning time by **70%**.
- Designed and managed secure hybrid AWS infrastructure (VPC, EC2, RDS, S3, CloudFront) to support multi-tier applications, improving scalability and compliance across public and private environments.
- Designed and deployed serverless microservices with AWS Lambda, API Gateway, and DynamoDB; integrated health checks and automated deployments via CI/CD pipelines, achieving **99% uptime** under dynamic load.
- Defined SLIs/SLOs and automated dashboards in Datadog to monitor service health, improving observability and cutting incident response time by **35%** through proactive alerting and metric-based reliability tracking.
- Developed Python and Ansible automation scripts to streamline provisioning, configuration, and deployment workflows, reducing manual intervention by **70%** and improving pipeline reliability.
- Implemented AWS security best practices (IAM, encryption, role-based access) and configured EMR and Firehose for big data ingestion pipelines integrated with S3 and RDS, ensuring secure, scalable data processing.
- Integrated Prometheus, Grafana, and CloudWatch with centralized alerting and escalation workflows, reducing incident response times by **40%** and enabling faster root-cause analysis.

Tata Consultancy Services | Cloud Engineer

Dec 2021 – July 2023 | India

- Managed application containerization and delivery using Docker and Azure Container Registry (ACR), implementing image signing and version tagging to reduce deployment inconsistencies by **20%** and enhance environment security.
- Engineered CI/CD pipelines using AWS CodeCommit, CodeBuild, and CodeDeploy to automate backend service delivery, reducing deployment time by **60%** and increasing release reliability.
- Configured Akamai CDN with AWS CloudFront to optimize caching and routing for global content delivery, reducing latency and improving page load speeds by **45%**.
- Configured and deployed **100+ AWS Lambda functions** via modular CloudFormation stacks integrated with API Gateway, ensuring scalable handling of **3K+ daily requests** and maintaining operational consistency across environments.

- Automated multi-environment infrastructure provisioning using Terraform and CloudFormation, reducing manual errors by **35%** and standardizing deployments across DEV, UAT, and PROD environments.
- Integrated Trivy vulnerability scans and IAM policy validation into CI/CD pipelines to enforce compliance and pre-deployment checks, reducing security incidents by **30%** and improving audit readiness.
- Led disaster recovery automation by scripting AMI snapshots, RDS backups, and Route 53 DNS failover, achieving **50% faster recovery times (RTO reduction)** and improved system resilience.
- Implemented proactive observability using Azure Monitor, Prometheus, and Grafana dashboards to enable real-time anomaly detection and reduce system response times by **25%** through automated alert workflows.

9acts cloud solutions | DevOps Engineer

Sep 2019 – Dec 2021 | India

- Assisted with provisioning of AWS EC2, S3, and RDS instances for internal development environments.
 - Created basic CI/CD pipelines in Jenkins, automating build and deploy steps for small applications.
 - Dockerized internal tools and deployed them using Docker Compose in UAT environments.
 - Supported writing and maintaining Bash scripts for server health checks and log cleanups.
 - Configured CloudWatch alarms and created dashboards for resource usage tracking and anomaly detection.
 - Managed IAM roles and policies for developers using AWS IAM, ensuring secure access to cloud resources.
 - Performed regular snapshots and backup validation using AWS native tools.
 - Documented system configurations and deployment instructions using Confluence and Jira.
 - Shadowed senior DevOps engineers in infrastructure migration efforts and post-deployment verification.
-

EDUCATION

University of Louisville | Master's in Computer Science

Aug 2023 – May 2025 | USA
